Art Unit 1713

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-30 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Alper et al.

The rejection as set forth under 35 U.S.C. § 102/103 in Paper No. 8 is deemed proper and is herein repeated.

Applicants' newly amended claims as well as the remarks filed in support thereof have been fully considered but have been deemed to be not persuasive.

Applicants' claims require that the amount of the tackifying resin is less than said total polymer composition. Applicants argue that this is not shown or suggested by the prior art. This is not persuasive. Applicants' attention is directed to column 10, Example 2 where 35 parts of the block copolymer are incorporated in combination with 10 parts of an aromatic reinforcing resin. This would render a composition having 45 parts of total polymer and 40 parts of the preferred tackifying resin. As such, the claims are seen to be anticipated.
